

Medical Coding Program

Apply for apprenticeship today!

Real-world experience is invaluable – especially if you are compensated for that experience. That's what apprenticeships are all about.

Benefits to Students:

- Get invaluable hands-on experience
- Receive dedicated mentorship throughout your apprenticeship
- Transition from education to experience
- Immediate marketability of skills and experience

About the Program

Today's medical coding job market is more competitive than ever. An apprenticeship is the perfect way to transition from education to experience and make yourself immediately marketable. PCC works with regional companies to provide paid employment opportunities to build your skills and experience while you're still in school.

Related Technical Instruction (RTI)

- Minimum of 144 hours of RTI per year
- Can be front-loaded, segmented, or in parallel with on-the-job training

On-the-Job Training (OJT)

- Minimum of 2,000 hours of structured and supervised on-the-job training
- Mentoring from experienced professional in the field

National Occupational Credential

- Apprentice earns nationally-recognized credentials once demonstrating identified competencies
- Recognized across industry

Requirements to Apply

- 18 or older
- High school diploma or equivalent
- Physically able to perform job duties
- Demonstrate interest in the job
- Able to pass a background check
- Demonstrate motivation, ambition, and a willingness to take direction
- Demonstrate trustworthiness
